

TABLE ASIA GALLERY - VINCE MEYER

Exquisite Japanese Antiques Reborn

The simplicity of form and graceful elegance of Japanese aesthetics takes center stage in Vince Meyer's artistry. Meyer specializes in designing and fabricating custom tables using antique and vintage Japanese panels and his own custom metalwork. As a metal artisan with 30 years of experience, Meyer has focused the last 20 years on bringing the beauty of Asian artifacts to a wider audience. This expertise has allowed him to turn his appreciation of Japanese art and craftsmanship into his own distinctive compositions.

To look closely at one of Meyer's extraordinary tables is to take a meditative journey. Finely crafted items originally found in Japanese homes and temples — wooden doors, panels, transoms, screens — are presented as refined furniture pieces rich with symbolism. Intricately crafted objects evoke the concepts of prosperity, wisdom, strength, and balance.

Meyer searches for and carefully selects these architectural gems. It's the intrinsic beauty of these unique Asian wood creations that is the inspiration for his workmanship.

The transformation of Asian artifacts into contemporary furnishings provides a timeless quality to Meyer's work. The harmonious, elegant tables complement virtually any decorative style.

Vince Meyer was born in San Francisco, California where he continues to live with his wife and young children. He studied architecture and has a degree in Environmental Design from the University of California, Berkeley.
